

Manifesto

It seems that we have a terrible situation on our hands and this situation will have to be dealt with in the most extreme ways possible to succeed.

How can we go on like this and how can we change this situation we find ourselves in. This document will be the way forward in how we think and how to think to survive this impending doom that lingers over society and our people within this society.

We are human beings that have feelings and these feelings and emotions will undoubtedly undermine our potential to succeed and to survive in the future. Once people can understand there feelings and there emotions of these feelings then we can move forward with proper understanding of what is required from us to survive and prosper and without this knowledge we will fail to prosper in the future.

The biggest problem we face from my understanding is that these Virus Lovers are worthless in all forms of there thinking and they disgust me greatly on all forms of there terrible thinking within this existence we share with them unfortunately. We the enlightened ones need to come to the barbaric decision to eliminate them from our thinking because they weaken our evolution of our thinking. These people lost there humanity the moment they lost all common sense and rejected all common sense given to them. It should be quite apparent by now that these people are nothing more than Programmed Perceptions Of Reality residing in a human body who's only mission is to conform to the majority through ridicule with pure stupidity that there all correct. These people will not back down from there warped reality that they have concocted that has no bearing on the true reality that we actually reside in.

These people are our ENEMY first and foremost to our way of life and our existence and there will come a point when they turn on us somehow in the future. Many of these people believe we are fools that are dangerous to their survival and these qualities in human beings can generate the most wicked actions through their survival instincts especially when they are mentally deranged in the process. Why waste our time on people who think we are foolish and dangerous that have never even thought to find out whether or not they are foolish and dangerous for believing we are foolish and dangerous.

It seems this situation we find ourselves in has brought out people's true intelligence like natural selection and some people are not good enough to be dealing with on this battlefield that we are on. It seems like humanity is splitting in two because some of the people have enlightened themselves with knowledge that these people claim to be BS but they have never researched this information themselves to know if the information is actually BS or not. These people have been bamboozled and whipped into pure insanity through group mind control and now they live in a delusion and want other people to join them in this delusion. I say NO to these people with their concerted efforts to drag us to their level of insanity and this must cease at ONCE.

We do not accept their pure stupidity and their arrogance of their delusions and we want to be accepted as people who do not believe in their delusions. We do not believe in this FAKE VIRUS and so we will be accepted as such and there will be no mention of any of this Virus business to any of us because it does not exist in our reality only in these people's warped delusional parasitic fantasy's. If these people want to play their stupid games then let them do so it is up to them if they destroy themselves or others in the process. These people are already destroyed anyway especially when they come to the conclusion that they have done this to themselves and have killed many more people indirectly through their sheer pig ignorance and pure rejection of the truth because their parasites that feed on each other's stupidity for comfort whilst the workers of truth burn in hell for their crimes.

These people are nothing more than animals that don't know there animals because there all animals and this is the reason why they can not figure out they have been Brainwashed to become the minds of beast with no complaint or understanding of such a mind set. It puzzles me greatly how come many of these animal workers have not yet figured out that they posses the minds of beast especially when working with animals is there profession.

These people have for the most part have had one year to sort out this mess in there heads and if people honestly believe they can wake anybody up after a year's worth of denial and ridicule towards the very people that are trying to help them then I would say there past any help.

If somebody turns out to be a rapist then they will be excommunicated by many people because there a rapist and who wants to be friends with a rapist or to be know to be a friend of a rapist to the majority. Why is not the case that these people that believe in this fake virus who are unwilling to listen are rapists to themselves or act in the manner of rapists to others and are raping people of there freedom. In this situation we have rapists that don't believe that a rapist exist because they were told so by the media but they still continue to rape our freedoms with there ignorance and denial.

We have all these people in society that believe in the same warped reality that they have consumed all there lives and now there completely oblivious to there oblivion. These people have not figured out that they have not been informed all there lives but have been programmed on mass to forge fake reality's and beliefs in there minds and society is just an illusion that is thought to be true. These people do not have the intelligence or the willingness to even rationalize that there Brainwashed and that they have Brainwashed themselves and each other with there stupidity repeating itself and have been dumbed down that much that there minds are that of a subterranean nature.

It would seem that spending our time with these kinds of people on a daily basis will only weaken our spirits because talking to animals all day and expecting them to listen and understand what is being said is not going to work. How are these people ever going to learn that they have done very bad things to themselves and others if we treat them in the opposite direction. Should we congratulate a child that has done something bad and condemn them when they have done something great. What sort of person will they turn out to be if this method is applied. To not make these people aware of your complete disapproval of there actions and to put up with them instead then you will not help them to see what they have done to themselves and that they need to fix themselves to be worthy of communication with us until they come to the conclusion of there failure to communicate in a rational fashion.

Our feelings and emotions towards these people will only get in the way of what is required to actually help them. Without understanding this process then these people who through there group mentality will walk all over people like us because we try to communicate with people that see us as fools which in an animalistic fashion dictates that we are the fools for debating with fools with full knowledge that we are debating with fools with foolish notions.

I can not see any other method than to excommunicate these people in the most courteous way possible as soon as possible.

Maybe these people will come to there senses when people actually act against them instead of trying to jack hammer information into there brains that they will not accept and thus we are forcing them to accept the information and are forcing them to live like us when it is clear that they do not want to live like us at all. Trying to do this will only force these people deeper into there programming of there belief system because they will have to accept more information that they will reject and the more information received will result in more denial.

We have to face the facts that these people want this life that they have chosen even if they hate it because this is what the programming expects and demands from them and there formation of that information as a group.

This thing is a giant game and the theme is to Brainwash everybody to the same belief system so there brains can only believe and act in accordance with this information being presented. Only the finest minds will see through this melee of madness.

Conspiracy Theorists are like packs of wolves that have no direct pack leader or methodology to facilitate the problems that we face. It seems that many want to change what they have instead of building what they want. The time has come when we will have to build what we want instead of trying to change the circus we are all in because they will not change the circus we are all in because many love the circus that we are all in.

The best way to show these people that we are far more intelligent than they will ever be or hope to be is to lead by example and to blaze a trail of glory straight passed them and watch them wince in there confusion.

To get out of this absolute mess we must

Think Now

Think Big

Think The Impossible

The only way out of this situation is to think completely different and well outside of the box if we want to survive in the future.

Most people do not know the power of five pounds or the fact that five pounds is of little benefit to many but what happens if five pounds is the answer to all our prayers if we all use our minds in a direct way.

The conclusion would be that if a Business/Charity can be created with one million truth seeking members that each donates just five pounds per week then that would give the Business/Charity five million pounds of investment per week to spend on assets and services that help our community of a million members and there family's.

From our members we would need as many professionals in all areas of

Agriculture

Buying & Selling

Transport

Health

Leisure

Housing

Tourism

Education

Financial

Media

Law

Engineering

Many people would not see a great deal of benefit in this system but others would benefit massively from it and it's real goal is to provide help to the members and there family's in many different ways.

If the people that invested small amounts of money into this Business/Charity then they could see the help they have created for others. I would say this would bring more joy to them than spending five pounds on a burger every week collectively and not seeing any change for anybody but themselves.

On a yearly basis £260,000,000 could be generated that could be spent in these ways

Country Estates / Listed Property's

(Twenty Million Per Annum)

These would be used for schools and the housing of family's that want to bring up there first born and future children in a work eat sleep environment that is completely devoid of all modern living and all immorality. If twenty family's could live within one house and raise fifty children together and educate them to be human beings instead of slaves then we are investing in humanity for the future.

There would be no need for money in these places and it would not even be necessary to leave these places because everything would be provided to make these children flourish. If people are getting dumbed down then we need to make these children the most intelligent and the most understanding human creations that has ever existed should be our policy. By nurturing these children's minds amongst great architecture and beautiful scenery then there could be the possibility that there minds may also turn out to be great and beautiful.

Many people complain about the education system been broken and degenerate towards the children's development. With this system and the investment the organisation could purchase twenty five of these property's over a ten year period. This would provide housing for over two thousand people whilst educating a thousand children in the finest manors of decency and intelligence.

Agriculture (All Types)

(One Hundred Million Per Annum)

If we can not feed ourselves or run the risk of food becoming very expensive then we must formulate a plan that can produce food at a very cheap cost for the members of the organisation. We may not be able to feed everybody completely but as time passes there should be plenty of products to be sold to the members. If we can cut out as many people that are making profit from our products then the products will be much cheaper for our members and of a much higher quality. We can reinvest any profits back into the business to provide more efficiency to expand as well.

The goal that must be set would to acquire ten thousand acres per annum over a ten year period resulting in a total acreage of one hundred thousand acres which is ten members per acre.

At the end of the ten year investment we would hope to have

100,000 (Acres Arable/Pasture)

20,000 (Sheep)

10,000 (Beef Cattle)

10,000 (Pigs)

5,000 (Dairy Cows)

1,000 (Horses Goats Ducks Chickens Pheasants etc)

We would need to be as self sufficient as possible and to manufacture everything that could be manufactured to reduce costs at all costs to bring the food price down for the members and make a small profit for reinvestment. There is no point paying other people to do the work and to make money from us when we have the money and the masses of labour.

Far more detail will have to go into this Agricultural plan but this is a start.

Housing

(One Hundred Million Per Annum)

The plan would to purchase more than a thousand houses per year and the people that occupy them will only have to pay half the rental costs. If we could house the most vulnerable people within our members then we could make there lives much better. The money from the rent would go to service these houses as well as building grand houses on the estates for more opportunity's to house more family's and to educate there children.

The ten year plan would be to acquire at least fifteen to twenty thousand homes and after the ten years the rent could be reduced to one quarter.

We would need a system in place to find and to facilitate the people that are the most destitute and in the most need that is based on many factors.

It would not be possible to house everybody but the basis of the plan is to help the people in the most need and to make money from them but at the same time giving them cheap housing. The housing may not be permanent in many cases but could be used to houses people that have found themselves in extreme situations.

If we could gather together twenty thousand homes then we would have fifty people to every house purchased within the one million members.

Buying / Selling / Delivery / Warehouse

(Cost Unknown or Ongoing Costs)

This would be the place that many would see many benefits because we can create a giant buying group for the one million members and the business's within the corporation that buys great quantities of products at reduced prices. All the goods will be examined for there quality and usefulness and only the very best products will be bought and sold that determines the best for human health and prosperity on a financial level as well.(These products would include the poison drinks and food products that are made for us to consume)

If the members are spending seventy pence per day on there investment over a ten year period then I am quite convinced that they could quite easily gain this money back through the savings they would encounter by buying all there products through this mechanism. If the members could reduce there monthly bills of up to fifty pounds then they would be profiting over there investments on a daily basis.

Services

(Thirty Eight Million Per Annum)

Health Services (23 million per annum)

Leisure Services (5 million per annum)

Other Services (10 million per annum)

Expenditure

(Two Million Per Annum)

One hundred people to run the organisation and to plan it's course for expansion and it's efficiency to be more useful to the majority and not the minority.

There should be plenty of jobs that could be created within this system and if we can use simple calculations then we could create even more jobs which is very easy to do.

The thing that people do not see is the fact that these factories are building and purchasing up to four times less than they need to or are spending four times less money to make four times more product. The only reason they can get away with this is because they get all the people to work around the clock seven days per week and use their time instead of spending the money and treating people like HUMAN BEINGS.

My policy has always been that people should only work twenty four hours per week over a four day period. The working week could be five days and each person has one day off per five days.

If this was to happen then for every two persons working now it will create one more job for somebody else. If we can pay the people the same pay with reduced hours then we can pay more people instead of giving more money to less people. There is no point increasing people's hourly rate when their hours should be decreased to increase their pay and create a situation that more work is needed now.

It may cost more to do this but if we could work things out to cover these costs and still return a small profit then more people will benefit and more people will have more time for themselves and their family's as well as having money because they are working.

This is just a simple plan that could be many pages longer but this should be sufficient for many to understand.
